

! Note !

For the following work, it is necessary to lift the motorbike to relieve the shock absorber. When doing so, ensure that the motorbike is standing securely and secure it against rolling away or tipping over.

Number plate holder AR-KH-HD-BRO038
with licence plate

Number plate holder AR-KH-HD-BRO038
with slide-in frame

Dismantling original parts

1. dismantle the rear silencers if necessary
2. Loosen the rear axle nut and remove the axle out

Mounting licence plate holder

1. loosen the rear axle nut
2. put on the number plate holder and fix it with the supplied clamping nut.
Tightening torque: 120Nm

Number plate holder mounted

We recommend using a medium-strength threadlocker (e.g. LOCTITE 243, blue) for the clamping nut.

Wiring

1. dismantle the seat
2. extend the licence plate light cables to under the seat.
3. solder the plug of the original wiring to the cable of the number plate light.
